

## Patient Consent for AI Scribe Dictation

Our clinic uses AI scribe technology to help document your medical visit. The system converts spoken words into written notes so your provider can focus more on you.

Your provider reviews and approves all notes before they are added to your medical record. The AI system does not make medical decisions or replace your provider's judgment.

---

### Privacy and Security

Your information is protected with secure technology, encryption, and strict access controls. Only authorized staff can view your records.

---

### Your Rights

- You may review or correct your records at any time.
- You may withdraw consent for AI scribe use at any time (for future visits).
- Withdrawing consent may slow documentation but will not affect your care.

---

### Possible Benefits

- More time focused on your care.
- Faster and more accurate documentation.

### Possible Risks

- Occasional transcription errors.
- AI may not recognize every accent or phrase perfectly.

---

### Consent

I have read and understood this information and had the chance to ask questions.  
I voluntarily consent to the use of AI scribe dictation during my medical visits.
